

EU Type Examination Certificate CML 18ATEX1268X Issue 0

- 1 Equipment intended for use in Potentially Explosive Atmospheres Directive 2014/34/EU
- 2 Equipment Ranges of Barrier and Diaphragm Seal Hybrid Cable Glands Types ICG 653/UNIV 710/711/753 and 501/453/UNIV
- 3 Manufacturer Hawke International (A Division of Hubbell Limited) (A Member of the Hubbell group of companies)
- 4 Address Oxford Street West Ashtonunder-Lyne OL7 0NA
- 5 The equipment is specified in the description of this certificate and the documents to which it refers.
- 6 CML B.V., Chamber of Commerce No 6738671, Hoogoorddreef 15, Amsterdam, 1101 BA, The Netherlands, Notified Body Number 2776, in accordance with Article 17 of Directive 2014/34/EU of the European Parliament and of the Council, dated 26 February 2014, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in the confidential reports listed in Section 12.

- 7 If an 'X' suffix appears after the certificate number, it indicates that the equipment is subject to conditions of safe use (affecting correct installation or safe use). These are specified in Section 14.
- 8 This EU Type Examination certificate relates only to the design and construction of the specified equipment or component. Further requirements of Directive 2014/34/EU Article 13 apply to the manufacture of the equipment or component and are separately certified.
- 9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the confidential report, has been demonstrated through compliance with the following documents:

EN 60079-0:2018 EN 60079-1:2014

EN 60079-7:2015

EN 60079-31:2014

10 The equipment shall be marked with the following:

⟨€x⟩_{II 2 G}

Ex db IIC Gb

II 2 G

Ex eb IIC Gb

Ex tb IIIC Db

Tamb = -60°C to +80°C (501/453UNIV - ICG 653 UNIV)

11 Description

The ranges of cable glands are designed in two versions: barrier and diaphragm seal. A further version which is a hybrid of the barrier and diaphragm seal glands is included.

All cable glands within the ranges are manufactured in brass, stainless steel or aluminium.

The glands comprising the following components:

ICG 653/UNIV Barrier Cable Glands	501/453/UNIV Diaphragm Seal Cable Glands	711 Barrier Cable Glands	753 Barrier Cable Glands	710 Barrier Cable Glands
) IP washer) Entry nut) *Deluge seal) *Silicone pot) *Silicone resin barrier) *Spigot) *Wire VBL clip) Clamping ring) Middle nut) Back nut clamp) Back nut seal) IP washer) Entry nut) *Deluge seal) *Diaphragm seal) *Spigot) Clamping ring) Middle nut) Back nut) Back nut clamp) Back nut seal) IP washer) Entry nut) Compound pot) Deluge seal) Compound barrier) Front diablo support) Diablo) Rear diablo support) Middle nut) Back nut clamp) Back nut seal) IP washer) Entry nut) Compound pot) Deluge seal) Compound barrier) Spigot) Clamping ring) Middle nut) Back nut clamp) Back nut seal) IP washer) Entry nut) Compound pot) Deluge seal) Compound barrier) Spigot) Middle nut) Back nut clamp) Back nut seal

Barrier Seal Type Cable Glands

The barrier seal type cable glands are of the types: ICG/653/UNIV, 710, 711 and 753.

They are designed for sealing around individual cores and are for use with circular cables of armoured, un-armoured or corrugated cables.

The gland's internal parts marked with an asterisk in the table above are interchangeable with respect to the type of application. When parts are interchanged, these assemblies may be dual marked with both product types on the stamping band. The 'deluge boot' colour indicates the internal component that is used, the ICG/653/UNIV being indicated by a red deluge boot. The gland assemblies as described above are rated for ingress protection IP66, 67, 69 and IPX8 at 30m for 7 days (special instructions required).

Diaphragm Seal Type Cable Glands

The diaphragm seal type cable glands are of type 501/453/UNIV.

The glands are fitted with a diaphragm silicone rubber seal and are designed for effectively filled type cable when used for flameproof applications. They are for use with cables that are circular and armoured or un-armoured.

The gland's internal parts marked with an asterisk in the table above are interchangeable with respect to the type of application. When parts are interchanged, these assemblies may be dual marked with

both product types on the stamping band. The 'deluge boot' colour indicates the internal component that is used, the 501/453/UNIV being indicated by a black deluge boot. The gland assemblies as described above are rated for ingress protection IP66, 67, 69 and IPX8 at 30m for 7 days (special instructions required).

Hybrid Glands

Hybrid cable glands are available for the cable gland types ICG 653/UNIV and 501/453/UNIV. These are fitted with the middlenut and backnut components of one gland size smaller in order to accommodate smaller size cables.

12 Certificate history and evaluation reports

Issue	Date	Associated report	Notes
0	10/05/2019	R11909A/00	Issue of prime certificate.

Note: Drawings that describe the equipment or component are listed in the Annex.

13 Conditions of manufacture

The following conditions are required of the manufacturing process for compliance with the certification.

13.1. Cable glands listed by this certificate have been subjected to overpressure test up to 62 bar/900 Psi.

14 Specific Conditions of Use

The following conditions relate to safe installation and/or use of the equipment.

- 14.1. Cable glands of type 501/453/UNIV, when fitted with unarmoured cables, shall be provided with an additional clamping device to prevent pulling or twisting forces transmitting to the terminations.
- 14.2. Cable glands of sizes D, E and F and containing XO99-41/2 resin, when fitted with unarmoured cables, shall be provided with an additional clamping device to prevent pulling or twisting forces transmitting to the terminations.
- 14.3. The ICG 653 UNIV, 501/453 UNIV cable glands when fitted with cold shrink on the cable outer sheath of specific cable types, the assembly instruction shall be implemented with Hawke drawing No. 320000 for those particular cable types.
